SEAN OREILLY

soreilly424@gmail.com | +1 913 961 0388 | seanpatrick.io

I am a motivated frontend developer, changing careers after many years in the education field. I'm proficient with the MERN stack, am a fast learner, and I'm enjoying every bit of the software development. .

EXPERIENCE

Frontend Web Developer   May. '21 -- Current
Freelance Web Developer - Next JS / PostgreSQL

- Led 4 project design, as well as gathering data for projects and reports.
- Designed and developed apps using various technologies, such as building the frontend using Next.js and TailwindCSS, and the backend using PostgreSQL, Hasura as an ORM and GraphQL.
- Customized CMS for clients to fit their needs and provide a neater, more organized UX using Sanity CMS.

Frontend intern   Feb. '21 -- May '21
Odd Camp - Ruby on Rails / React

- Built and rolled out 2 projects with a team of 4 developers that provides funding tools to European citizens.
- Implemented Google Analytics 4, Ahoy Tracking, and JSON Schema for SEO optimization.
- Upgraded code into reusable Ruby on Rails view components improving the efficiency for future projects.
- Used BEM style conventions and TailwindCSS on the frontend.

EDUCATION

Software Engineering coding bootcamp   Oct. '20 -- Dec '20
Le Wagon, Mexico City
Full-time Ruby on Rails / PostgreSQL / JavaScript / Bootstrap

The University of Kansas   Sep. '10 -- Dec '14
Bachelors of Arts in History

LANGUAGES AND TECHNOLOGIES

- Languages and Frameworks: JavaScript, HTML/CSS, React, Ruby on Rails, Next.js
- Technologies and tools: Redux, TailwindCSS, Git, PostgreSQL
- Other: API design, relational databases, Google analytics, JAMstack architecture, unit testing

PROJECTS

Divespots **- React / PostgreSQL / GraphQL / TailwindCSS**
A unique way for connecting with other divers and sharing scuba diving information. See the code on GitHub.

Artist websites **- React / Custom CMS using Sanity / TailwindCSS / Stripe**
Built custom websites for artists where they can share their work and for one artist he can sell his artwork. See an example here.

Booklub - Ruby on Rails / PostgreSQL / Bootstrap
App for online book clubs where users are in charge of creation and privacy. See the code on GitHub.
